

SEMINAR PROGRAM

Technology working for you.

We congratulate you on your decision to invest in our training program.

Machine setter seminars

In these seminars, you take part in an intensive course of theoretical study and practical training on simulators and on the machine. Participants are taught in small groups to achieve effective learning.

- *Who can take part?*
Machine setters with process technology experience, technicians, shift foremen, department managers, skilled staff, machine operators.
- *What is taught?*
WITTMANN BATTENFELD injection molding / Setting and optimal adjustment of the clamping and injection units / Machine monitoring facilities / Troubleshooting and diagnostics / Graphical visualization / Statistical quality monitoring / Data storage / Printer functions / Process optimization.
- *Skills acquired on completion*
Optimization of the injection process / Quality monitoring / Error diagnostics / Optimization of temperature control parameters / Application of core pull programs.

Seminar schedule

Kottingbrunn week 11, 13 – 15 March 2012,€	730.- EUR
Kottingbrunn week 42, 16 – 18 Oct. 2012,€	730.- EUR

WITTMANN BATTENFELD offers injection molding technology with a global sales and service network and realizes flexible training concepts, which are based on many years of experience and are optimally geared to your needs. We have developed the main subjects according to the wishes and requirements of our customers.

Service seminars

WITTMANN BATTENFELD offers you special service seminars concentrating on the technical side, i. e. the machine's mechanics, hydraulic system and electrical parts. In the course of these maintenance seminars, participants are familiarized with the principles and system of preventive maintenance for injection molding machines and ways to increase machine uptime.

- *Who can take part?*
Machine setters, service staff, technicians, shift foremen, technical advisers, skilled staff, specialists, service administrators, machine operators.
- *What is taught?*
WITTMANN BATTENFELD injection molding machine system / Hydraulic system / Electrical system / Error search and diagnostics / Maintenance.
- *Skills acquired on completion*
Error analysis and identification / Calibration of measuring devices in the machine / Setting and optimization of mechanical, hydraulic and electrical machine components.

Seminar schedule

Kottingbrunn week 16, 17 – 19 April 2012,	920.- EUR
Kottingbrunn week 41, 9 – 11 Oct. 2012,	920.- EUR

SEMINAR PROGRAM

Individual training at the client's premise.

Individual training

Taking the initiative means securing the decisive edge. In view of increasing competitive pressure, excellent production results are expected of you as a matter of course. This demands highly qualified skilled workers who keep abreast of the state of the art. Companies certified according to DIN EN ISO 9001 are required to offer regular further training to their employees. Yet companies are all too often prevented from sending their staff to seminars taking place on fixed dates because of tight schedules on their own production floor. Another point is that special applications may not be covered sufficiently by what is taught in such standardized seminars. Here, WITTMANN BATTENFELD offers you the option of individual training programs which guarantee maximum flexibility in every respect. According to your requirements, the seminars are held on site at your premises or at our facility. You are also free to select the subjects.

The subjects are categorized as follows:

- Machine setter seminars
- Service seminars
- Process technology seminars
- Seminars on robot applications
- Multi-component seminar upon request

Moreover, we will be glad to offer you a training schedule which takes into account the special possibilities and conditions in your production facility, such as shift operation.

Would you like to know more about our individual training program? Then please contact:
